

Build Your Own Crane

If you wish to be manufacturer/fabricator yourself, we have a program for you- **“Build Your Own Crane”**

This is a unique and high yielding concept.

1). What are the Prerequisites?

You should have a fabrication shop with welding machines, cutting machines and other tools and tackles.

2). What will I get from Reva:

- Quotation and necessary technical help to get the order.
- Crane Parts
 - a). Hoisting and cross travel mechanism
 - b). End carriages with long travel mechanism
 - c). Electrical controls, push button stations and CT DSL cables
 - d). Manufacturing drawing of the Crane Bridge
 - e). Installation and Maintenance manual
- Necessary 2-Day training at Reva Workshop
- Authorised System Integrator letter from Reva

3). Who will market the Crane?

You will have to market and get orders in your/Reva name

4). How will I get paid?

The order will be received by the customer in your name, so the payments will be directly received by you from the customer. You have the option of increasing the cost provided by us in order to add your margins onto the same.
